Have you ever

- Disagreed with colleagues over a proposed course of treatment for a child?
- Considered ways to 'bump' a child up on a waiting list to speed up their assessment?
- Wondered how to deal with a family that repeatedly fails to keep clinical appointments?

### From the Foreword

*"This is a must-have book for everyone who works in the field of clinical childhood disability. There is something for all clinicians, therapists, nurses, and doctors whether in training or established in clinical practice for many years. This book 'works' because it is full of real stories of the situations we will all recognise from our own practice, written and edited by internationally renowned and respected clinicians and others with direct experience, who share their 'workings out' of the ethical issues discussed."*
